Welcome to Kerala. Welcome to a prosperous future...

Food Processing

Kerala with its indigenous shades of biodiversity has always been a food basket of global interest. The pulse of the land gets carried over through the diversity of Kerala's food products of cashews, seafood and spices. Coconut, cocoa, tea, banana and pineapple add to the lore the richness of our taste buds. Kerala, synonymous with exotic spices is the major exporter of Spices from the Country. Over 90% of pepper produced in India is from Kerala, which also the hub of a variety of spice based products. Besides the traditional application as a flavouring and preservative agent in food and beverages, spices today caters to industries such as cosmetics, aromatics, oils & oleoresins, pharmaceuticals, etc. Spices also provide the right flavour to the fast growing food processing industries in the State. The pioneering and persistent efforts of the Department of Industries and Commerce, Government of Kerala have been instrumental in bridging the local varieties of taste to an international populace. The Department of Industries & Commerce, Government of Kerala, by promoting the Food Safety (HACCP) Certification, makes its concerns of food safety, health and hygiene mandatory for the wellbeing of the sector.
