## Ministry of Commerce of the People's Republic of China

### Announcement

2015 Number 22

The Ministry of Commerce of the People's Republic of China (hereinafter referred to as MOC) on May 29, 2015 received an application for anti-dumping investigation officially submitted by Jilin Qifeng Chemical Fiber Co. Ltd., Jilin Jimeng Acrylic Fiber Co. Ltd., Zhejiang Hangzhou Bay Acrylic Fiber Co. Ltd. and Ningbo Zhongxin Acrylic Fiber Co. Ltd. (hereinafter referred to as applicants) on behalf of China's domestic acrylic fiber industry, and applicants requested to conduct an anti-dumping investigation to the imported polyacrylonitrile fiber originated in Japan, the Republic of Korea and Turkey. In accordance with the <Anti-Dumping Regulation of the People's Republic of China>, the Ministry of Commerce reviewed and examined applicants' qualification, the products applying for investigation, China's congeneric products, the imported products' impact on domestic industry and the relevant information about the countries (region) that have been applied for investigation.

Based on the evidences provided by applicants and a MOC preliminary review, the total production of polyacrylonitrile fiber produced by both applicants and SINOPEC Shanghai Petroleum & Chemical Co. Ltd. that supports the application conforms to the regulations on domestic industry to submit an application of anti-dumping investigation in Article 11, Article 13 and Article 17 of the <Anti-Dumping Regulation of the People's Republic of China>.

The application claimed that polyacrylonitrile fiber originated in Japan, the Republic of Korea and Turkey are being exported and sold to China at an export price lower than normal value. Based on the evidences and information that have been obtained in a reasonable way, and by using the export price of Japan and Turkey's congeneric products applied for investigation to export to other markets outside China as a basis to determine the normal value of polyacrylonitrile fiber of Japan and Turkey, by using the selling price at ROK markets of congeneric products applied for investigation as a basis to determine the normal value of ROK's polyacrylonitrile fiber, and by using the statistic price of the products applied for investigation to export to Chinese customs as a basis to determine the export price, and after having adjusted the factors which affect the price comparability, applicants claimed in the application that there is existing

substantial dumping acts of the products applied for investigation. At the same time, the application claimed that the products applied for investigation in quantity generally show an increasing trend in entering Chinese markets, suppressing and depressing the price of congeneric products of domestic industry, resulting in deterioration of production operation indicators including pre-tax and after-tax profits, rate of return on investment, rate of operation, inventory, employment figure and financing capacity, and domestic industry suffering from substantial damage. In addition, there exist causality between the dumping acts of the products applied for investigation and domestic industry suffering from substantial damage. After having made a review and examination, the Ministry of Commerce believes that the application has contained the contents and the related evidences required in anti-dumping investigation and filing that are stipulated in Article 14 and Article 15 of the <Anti-Dumping Regulation of the People's Republic of China>.

Based on the results of the above-mentioned review and examination, and in accordance with Article 16 of the <Anti-Dumping Regulation of the People's Republic of China>, the Ministry of Commerce has decided, as of July 14, 2015 to start an anti-dumping investigation to the imported polyacrylonitrile fiber originated in Japan, the Republic of Korea and Turkey. The related matters are now announced as follows:

### **1. Put on filing and investigation and the period of investigation**

Since the date of release of the announcement, the Ministry of Commerce shall start an anti-dumping investigation to the imported polyacrylonitrile fiber originated in Japan, the Republic of Korea and Turkey. The dumping investigation period determined by the investigation was from January 1, 2014 to December 31, 2014, and the investigation period of industry suffering from damage was from January 1, 2011 to December 31, 2014.

### **2. The investigated products and the scope of investigation**

The scope of investigation: the imported polyacrylonitrile fiber originated in Japan, the Republic of Korea and Turkey.

Name of the investigated products: Polyacrylonitrile fiber or Acrylic fiber

English Name: Polyacrylonitrile fiber or Acrylic fiber

Chemical structural formula:

**R indicates: CN or other functional genes**

**Product description:** acrylic is a kind of synthetic fiber made of copolymer with propylene sunny as the main monomer, and the appearance is usually white (can also be dyed to other colors), curled up, fluffy, soft handfeel, like wool, and warmth retention higher than wool which is called as "synthetic wool". Acrylic fiber has smaller relative density and better chemical stability (acid-resistance, weak Alkali- resistance, anti-oxidant and anti-general organic solvent), and has excellent properties such as light fastness, heat resistance, weather resistance, mould proof and moth proof. Acrylic fiber usually is divided into three kinds of specification of Acrylic tow, Acrylic staple fiber and Acrylic top.

**Main uses:** Acrylic fiber, after usually being spun into yarn through cotton spinning or wool spinning is mainly used in the clothing (such as hat, glove, scarf, artificial furs, knit-wear and knitted sportswear), decoration (such as carpet and curtain), blanket and stuffed toys as well as outdoors (such as dustcoat for vehicle and ship) and so on.

The product is under the items 55013000, 55033000 and 55063000 of the <Import and Export Tariff of the People's Republic of China>.

**3. Registration to participate in the investigation**

Within 20 days as of the date of release of the announcement, any interested parties can register with the Trade Remedy and Investigation Bureau of the Ministry of Commerce to participate in the anti-dumping investigation. The interested parties participating in the investigation shall, according to the <Reference Format for Registration to Participate in the Investigation> provide explanation materials including the basic identity information, the quantity and amount of the investigated products to export to China or import during the period of dumping investigation, the quantity and amount of producing and selling the congeneric products and the relevant information. The <Reference Format for Registration to Participate in the Investigation> can be downloaded from the relevant websites (enclosed herewith please find the website).

The interested parties mentioned in the announcement are the individuals and organizations that are stipulated in Article 19 of the <Anti-Dumping Regulation of the People's Republic of China>.

#### **4. Access to public information**

The interested parties can look up, read, transcribe and copy the unclassified version of the application submitted by the applicants of the case by downloading from the relevant websites or at the reference room of public information on trade remedy of the Ministry of Commerce (Tel: 0086-10-65197878). In the process of investigation, the interested parties can look up the public information relating to the case through the relevant websites or look up, read, transcribe and copy the public information relating to the case at the reference room of public information on trade remedy of the Ministry of Commerce.

#### **5. Comment on putting the case on file**

If there is a need to make comment on the scope of the products under investigation and the qualification of applicants, the countries (regions) under investigation and other relevant questions, the interested parties can submit written opinions to the Trade Remedy and Investigation Bureau of the Ministry of Commerce within 20 days as of the date of release of the announcement.

#### **6. Methods of investigation**

In accordance with Article 20 of the <Anti-Dumping Regulation of the People's Republic of China>, the Ministry of Commerce can ask the interested parties for information or make investigations by using a variety of ways such as questionnaire, sampling, hearing and on-site verification.

In order to obtain the information required by the investigation relating to the case, the Ministry of Commerce usually issues the investigation questionnaire to foreign exporters or producers, domestic producers and domestic importers relating to the case within 10 working days since the deadline of participation in registration of investigation specified in the announcement. The interested parties participating in registration of investigation also can download the investigation questionnaire from the relevant websites. <Investigation Questionnaire for Foreign Exporters and Producers in Anti-dumping Case of Polyacrylonitrile Fiber> enquires the following information such as structure and operation of company, products under investigation, export sales to China (mainland), domestic (regional) sales, operation and finance, production cost and related expenses, estimated dumping margin and check slip. <Investigation Questionnaire for Domestic Producers in Anti-dumping Case of Polyacrylonitrile Fiber> enquires the following information such as basic information of company, domestic congeneric products, operation and related information, finance and related information and questions

that need to be explained. <Investigation Questionnaire for Domestic Importers in Anti-dumping Case of Polyacrylonitrile Fiber> enquires the following information such as basic information of company, trade of products under investigation and related information.

Other interested parties not participating in the registration of investigation can directly download from the relevant websites or ask for the above-mentioned questionnaires from the Trade Remedy and Investigation Bureau of the Ministry of Commerce, and fill in the questionnaires as required.

All companies relating to the case should submit complete and accurate answers within the prescribed time in line with the scope of products under investigation specified in the announcement and on the basis of the three kinds of specification of Acrylic tow, Acrylic staple fiber and Acrylic top. The answers should include all information required in the investigation questionnaires.

#### **7. Submission and handling of confidential information**

If the information submitted by an interested party to the Ministry of Commerce needs to keep secret, the interested party can make a request to the Ministry of Commerce for keeping the relevant information secret and explain the reason. If the Ministry of Commerce agrees with its request, the interested party applying for keeping secret meanwhile should provide a non-confidential outline of the confidential information. The non-confidential outline should contain full and significant information so that other interested parties can have a reasonable understanding of confidential information. If non-confidential outline can't be provided, an explanation of the reasons should be given. If interested parties do not request for keeping it secret when submitting their information, the Ministry of Commerce will regard the information as public information.

#### **8. Consequences of non-cooperation**

In accordance with Article 21 of the <Anti-Dumping Regulation of the People's Republic of China>, the interested parties should give a truthful report of the situation and provide the relevant materials when the Ministry of Commerce makes investigations. If the interested parties do not reflect things as they really are and provide the relevant materials, or do not provide the necessary information within the reasonable time, or severely hamper the investigation in other ways, the Ministry of Commerce can give a ruling based on the facts that have been obtained and the best information available.

## **9. Period of investigation**

The investigation starts from July 14, 2015, usually will end before July 14, 2016, and in exceptional circumstances, can extend to January 14, 2017.
