NILEDUTCH AND SOPORTOS

YOUR EFFICIENT GATEWAY TO LUANDA

SAVING YOU TIME AND COSTS

Soportos is one of the most service minded container terminals in Luanda, Angola's main port. NileDutch exclusively operates with all its services, from Europe, Asia, South America and South Africa, at this terminal which gives you excellent access to Angola's booming market.

EFFICIENT CONTAINER HANDLING AND DELIVERY

Soportos is a modern and fully equipped container terminal entirely dedicated to NileDutch activities. Upon discharge your containers are transferred to the second-line terminal of Mulemba, very near to the port area. Your containers will be stacked separately per lot to ensure fast pick up. You have the option to organise your own transport or alternatively Soportos can deliver your containers by road to the final destination, using their own truck fleet.

For those client that require after finalizing the custom clearance of their containers, additional storage facilities, Soportos can transfer the containers from the custom bound area to the commercial area of the Mulemba terminal where containers can be stored at a commercial, to be negotiated, tariff which is far below the official port tariff.

The Soportos terminal is efficiently set up to ensure that your containers are handled as quickly as possible. Having the second-line terminal just 5km north of the port also ensures time savings compared to the other terminals and their second line terminals.

PERSONALIZED NILEDUTCH SERVICE

NileDutch has dedicated staff at the terminal to ensure that you receive the usual high level service. We also have a special office for VIP accounts, saving you even more time. NileDutch has provided regular shipping services to and from Angola since more than 30 years.

SOPORTOS FACILITIES

The Soportos terminal opened in 2009 and can quickly unload NileDutch's container vessels with its seven cranes. The terminal has a bonded storage capacity of 7000 containers and at the second-line a bounded storage capacity of 6000 containers and a storage capacity of 4000 ctrs at the commercial area with favourable storage fees. The company's fleet of around 500 trucks ensures efficient delivery to the final destination.

BENEFITS TO YOU

The NileDutch/Soportos partnership saves you time and money and the optional trucking facilities can help you to optimise the logistics of your operations in Angola.
