30th June, 2011

The Ambassador
Embassy of Turkey
Accra

Dear Your Excellency,

REQUEST FOR TURKISH ENERGY COMPANIES TO PARTICIPATE IN THE POWER AND ELECTRICITY EXPO IN GHANA.

Under the distinguished auspices of the Ministry of Energy and Ministry Trade & Industry Ghana, Moontrust Consult Ltd an event management and marketing company, organizers of the 1st INTERNATIONAL POWER & ELECTRICITY EXPO respectfully invites Turkish energy companies from your country to participate in this International Energy Expo scheduled for the 23rd - 25th November, 2011 at the prestigious Accra International Conference Centre under the theme "Power and Electricity Important Energy Indicators for Economic Growth-The Role of Government and Private Sector". Please visit www.powerandelectricityexpogh.com for details on the Expo and Conference.

Ghana as a developing economy needs sufficient, reliable and affordable energy for industrial and domestic uses as well as export to other African countries. As a growing economy with lots of potential in the establishment of industries in the future, huge energy would be needed to manufacture products and for domestic use. There is therefore the need to have reliable and affordable energy source to meet the demand. Government and the private sector must be seen to be playing a key role in the realization of this objective hence Public Private Partnership in the power and electricity sector.

Turkish companies have the expertise, skills and experience in the areas of power generation, transmission, and distributing to assist Ghana achieve energy sufficiency. Companies who produce power generators, power tools, oil & gas companies, electrical cables, solar panels, windmills, electric transformers, metering & billing services, consultants and others are very much invited to exhibit and participate in the Power & Electricity Expo.

The main objective for the organization of this Energy Expo and conference is to bring under one-roof government officials, policy makers, energy experts, producers of power tools, electrical cables, electric generators, electric transformers and the general public in sharing

ideas for the sustainability of the generation, transmission, distribution of power and electricity in Ghana and beyond. It is also an opportunity for companies to showcase their latest technologies in the generation of clean affordable power and electric products.

We would be pleased to meet you on the above to further discuss the participation Turkish companies for the benefit of both countries. An invitation letter would soon be extended to you, to attend the launching ceremony of Power & Electricity Expo 2011.

Attached are the endorsement letters from the Ministry of Energy and Ministry of Trade & Industry.

Thank you.

Yours faithfully,

Edwin Tappay Battah
CEO/Events Director
