APHIS is advising the public of our decision to concur with the World Organization for Animal Health's (OIE) bovine spongiform encephalopathy (BSE) risk designations for 14 regions. The OIE recognizes these regions as being of negligible risk for BSE. We are taking this action based on our review of information supporting the OIE's risk designations for these regions.

Addendum

The following communication, received on 15 August 2016, is being circulated at the request of the Delegation of the United States of America.

Final Rule: National Poultry Improvement Plan and Auxiliary Provisions (Docket # APHIS-2014-0101)

The Animal and Plant Health Inspection Service (APHIS) is amending the National Poultry Improvement Plan (NPIP), its auxiliary provisions, and the indemnity regulations for the control of H5 and H7 low pathogenic avian influenza. Specifically, we are clarifying who may participate in the NPIP, amending participation requirements, amending definitions for poultry and breeding stock, amending the approval process for new diagnostic tests, and amending slaughter plant inspection and laboratory inspection and testing requirements. These changes will align the regulations with international standards and make them more transparent to Animal and Plant Health Inspection Service stakeholders and the general public. The changes in this final rule were voted on and approved by the voting delegates at the Plan's 2014 National Plan Conference.

The Notice is available in English at: <https://www.regulations.gov/document?D=APHIS-2014-0101-0004>.
