Roasted coffee and ground coffee

Product overview:

Café Serrano Selecto: Authentic 100% washed Arabica coffee, from the mountains of Cuba, is obtained from the mixture of selected high-quality beans, grown under shade and dried naturally in the sun. Uniform roasting, pleasant aroma and a healthy, sweet and smooth cup; with medium body and slight acidity.

Café Turquino Montañés: Genuine Cuban coffee, 100% Arabica, from the best plantations in our mountains, grown under shade and dried naturally in the sun, with two centuries of coffee culture. Top quality washed coffee, with excellent roasting, special aroma, a healthy, sweet and soft cup; full-bodied and medium acidity.

EXPORTABLE PRODUCTS OFFER

Café Athmosphere: It is a brand that represents the spirit of the best coffee in Cuba, an exceptional gourmet, without equal, with an aroma that fills the senses, and an unforgettable flavor, the obtaining of which is only the result of beans grown and benefited with utmost care, completely handmade, fruit of the wisdom of men and women of a mystical region, for its climate, soils and beauty of its surroundings: "El Nicho", unique place in Escambray, where the COHIBA ATMOSPHERE is born, grows and is obtained. It has a medium to dark brown, uniform powder. It is characterized by having a very good aroma and being completely clean. It has a very good body and acidity, very smooth and with great balance, consistency and fragrance.

Café Montecristo: The plantations that give rise to the MONTECRISTO DELEGGEND gourmet are located in "Alto la Meseta", one of the main agro-ecological areas of the Sierra Maestra, the easternmost of the Cuban mountain ranges.

"Alto La Meseta" is a very special corner. Its soils fertilized only with organic matter, with a completely balanced, natural ecosystem and a centuries-old tradition in the cultivation and benefit of coffee, give a unique character to the beans obtained in this place.

It is characterized by being a medium to dark brown powder, uniform, with a good aroma and clean. The body of the coffee is absolutely clean and acidic. It has a good balance, consistency and fragrance.

Format: 250, 500 grams and 1 kg's packages with the followings brands: Serrano Selecto and Turquino Montañés. 250 grams's Packages for Café Athmosphere and Montecristo.

EXPORTABLE PRODUCTS OFFER

Charcoal

Characteristics: Charcoal is produced in artisanal kilns in a natural way, using as raw material the residual of sawn wood and woody residues from logging areas, so it does not constitute a cause of deforestation. Marabou charcoal is considered among the best in the world for its high caloric and energy power.

- Homogeneous particle size.
- Minimum fixed carbon content of 82%.
- Maximum moisture content of 7%
- Maximum volatile materials of 12%.
- Free of coadjuvants and binders.

Characteristics of Cuban artisan coal

- It comes from hard and semi-hard woods such as *Soplillo*, *Yana*, *Júcaro*, *Casuarina*, and *Marabú*.
- Granulometry in the range of 40 mm to 200 mm.
- Moisture content between 5-10%.
- Not sparkling.
- Dust free.

The following table reflects the characteristics of Cuban coal by species:

Specie	Scientific Name	Density (Kg/m ³)	Volatile Matter (%)	Fixed carbon (%)	Cont. Ashes (%)
<i>Soplillo</i>	<i>Lysiloma Bahamensis</i>	260	8.7	77	10.25
<i>Llana</i>	<i>Conocarpus Erecta L.</i>	404	12.0	87	11.26
<i>Casuarina</i>	<i>C. Equisetifólica F.</i>	463	18.0	81	2.03
<i>Júcaro A</i>	<i>Buchenavia Capitata</i>	418	10.0	87	5.37

Format: polypropylene bottle with 80 tablets

EXPORTABLE PRODUCTS OFFER

Vimang®: natural product to improve human health. This natural product that is used to improve human health and quality of life, has three main production lines: aqueous extract, syrup and cream, the latter for therapeutic and cosmetic purposes.

Biorat: is a biological rodenticide whose active ingredient is the bacterium *Salmonella enteritidis* var *Danhyz Lys* (-) phage type 6a. Used for the control of synanthropic rodents including *Rattus rattus*, *Rattus norvegicus* and *Mus musculus* in livestock, agricultural and urban environments.

Format: It comes in polyethylene bags of 4 Kg and 50g mini-dose. It is recommended for its effectiveness, it does not cause suspicion of the bait, it does not affect man or domestic animals, it is biodegradable and does not generate resistance or rejection.

Griselesf: is a residual action biolarvicide whose active ingredient is *Bacillus sphaericus* strain 2362. It is used for the control of mosquito larvae of the genera *Anopheles*, *Culex*, *Mansonia* and *Psorophora*. It is applied in mosquito breeding sites in both clean and contaminated water, thus interrupting the life cycle of the vector, which contributes to disease control.

Effective in the fight against the larvae of the mosquito species: *Culex quinquefasciatus*, *Culex erraticus*, *Culex nigripalpus*, *Anopheles albimanus*, *Psorophora confinnis*, *Mansonia titillans*, *Aedes taeniorhynchus*, *Uranotaenia saphirina*, between I and early IV stages. It does not act on the pupae. These species are vectors of the causative agents of diseases such as: *Filariasis*, *Malaria*, *Encephalitis*, among other diseases transmitted by mosquitoes.

EXPORTABLE PRODUCTS OFFER

Format: It comes in 20L plastic tanks. Its use is recommended as it is an effective, residual, biodegradable product, it does not affect man or other species and does not generate physiological resistance.

Bactivec: is a fast acting biolarvicide with *Bacillus thuringiensis israelensis* 266/2 as an active ingredient. It is used to control mosquito larvae of the genera *Aedes*, *Culex*, *Psorophora*, *Anopheles*, *Mansonia*, among others, as well as Simúlidos or black flies.

It is applied in large mosquito breeding sites or in domestic containers, thus interrupting the life cycle of the vector, which contributes to disease control. *Aedes aegypti* is highly susceptible to this biolarvicide. These species are vectors of disease-causing agents such as: dengue, filariasis, encephalitis, malaria, and onchocerciasis.

Format: It comes in 20 L tanks and 30 ml bottles for intra-household and community use. Its use is recommended because it is an effective, biodegradable product, it does not affect man or other species and does not generate physiological resistance.
