The Department of Foreign Economic Activity and Trade Protection of the Ministry of Economy, as part of an anti-dumping investigation into the import of radiators for heating from the Republic of Türkiye and the People's Republic of China (hereinafter referred to as the investigation) into Ukraine, reports the following.

The investigation is conducted in accordance with the Agreement on the Application of Article VI of the General Agreement on Tariffs and Trade of 1994 and the Law of Ukraine "On the Protection of National Product Producers from Dumping Imports" (hereinafter - the Law).

At the same time, we inform you that for the purpose of quick access and familiarization of interested parties with non-confidential materials of the case, a folder "АД Радіатори" has been created on the cloud storage (Google Drive), which is available at the following link: <http://surl.li/tpzzj>. The "1\_Скапра" folder contains the non-confidential version of the complaint about the violation and investigation.

During the investigation, the information in the repository will be periodically updated.

If the interested party intends to appoint another person (legal representative) to act on its behalf as part of the investigation, such party must ensure that the appropriate power of attorney is properly executed and sent to the Ministry of Economy.

We recommend sending confidential information as part of the investigation to the e-mail address of the Ministry of Economy ([meconomy@me.gov.ua](mailto:meconomy@me.gov.ua)) and employees of the Ministry of Economy responsible for the investigation ([kolesnikov@me.gov.ua](mailto:kolesnikov@me.gov.ua), [oslyniavuk@me.gov.ua](mailto:oslyniavuk@me.gov.ua)). In addition, in view of the presence of varieties of the product that is the object of the investigation, and in order to ensure a fair comparison of product prices, the issue of conducting a study in terms of product control numbers (PCNs) combined according to the main criteria that have the greatest influence on the formation of their cost price and/or the belonging of the product to a certain category.

The legal representative of SUN TECH RAY LLC and UTERM UKRAINE LLC submitted proposals regarding the method of generating product control numbers (PCN) as part of the investigation (attached).

Please note that as part of the investigation, information will be requested in terms of product control numbers (PCNs), including production, post-operational sales, unit cost, etc.

Also, in view of the significant number of exporters who have registered as interested parties in the framework of the investigation, in accordance with Articles 9 and 30 of the Law, the investigation of the existence of facts of dumping imports will be limited to foreign producers/exporters with the largest volumes of export deliveries of radiators for heating, which can be investigated within the time limits, defined by the Law.

According to the results of the analysis of the available information of the State Customs Service of Ukraine regarding the volume of imports of radiators for heating into Ukraine during the period from the II quarter of 2023 to the I quarter of 2024, the study will be limited to the following foreign manufacturers:

Despite this, questionnaires will be sent to all foreign manufacturers who are registered as interested parties to the investigation. Answers to the questionnaire from producers who were not included in the sample may be taken into account in the case of refusal of the selected producers to cooperate with the Ministry of Economy and if taking into account such answers will not prevent the timely termination of the investigation and the adoption of a decision on the application of anti-dumping measures.
